The purpose of the international conference there are discussion of the problems of computer materials science, building materials science, construction products and structures, and additive manufacturing: technology and materials.

SCIENTIFIC PROGRAM

The conference includes work in the following areas:

1. Materials science models of different levels.
2. Mathematical modeling and optimization of materials and structures.
3. Elements of computer materials science.
4. Additive manufacturing: technology and materials.
5. New building materials and technologies.

Working languages of the conference: Ukrainian, English.

TERMS OF PARTICIPATION:

Send to the organizing committee in a timely manner:

1. Application for participation (the content of the application is given below);
2. The electronic version of the abstracts of the report to the e-mail address:
